Privanova

YOUR ONE-STOP SHOP
GDPR COMPLIANCE PROVIDER

Privanova is a consortium member of the CC-DRIVER: an international R&D project funded by the European Union as part of its Horizon2020 programme.

CC-DRIVER combines psychology, criminology, anthropology, neurobiology and cyberpsychology to investigate, identify, understand and explain drivers of new forms of criminality.

Focused on human factors that determine criminal behaviours such as cyber juvenile delinquency and adolescent hacking, CC-DRIVER benefits from the direct involvement of several Law Enforcement Agencies.

CC-DRIVER

Understanding the drivers of cybercriminality, and new methods to prevent, investigate and mitigate cybercriminal behaviour

Budget

€ 4 997 630,00
from May 2020 to April 2023

Consortium

13 Partners from: UK, Finland, Greece, Romania, Spain, Portugal, Germany, Switzerland, and France

Privanova's role

Privanova has two main roles in CC-DRIVER.

Firstly, we focus on the Privacy, Data Protection and Ethics Compliance. We take part in WP6 on Ethics, Data Protection and Socio-Economic Impact Assessment. Here we lead the efforts around the management of the Ethics Advisory Board. We help the consortium address the Ethics Requirements received during the evaluation phase of the proposal. We also contribute to tasks on performing the Ethical, Privacy and Socio-Economic Impact Assessment.

Secondly, we leverage our experience and network of Law Enforcement Experts. We lead the CC-DRIVER's Stakeholders' Advisory Board and ensure liaison between its experts and the consortium partners during requirements analysis, project implementation and piloting phases.

Impact

CC-DRIVER aims to educate and divert youth from crime. It investigates Cybercrime-as-a-Service and provides decision-makers and citizens with a shared view of its impacts on our society and what we can do to overcome them.
