

**Privanova**  
RESEARCH & CONSULTING

**Privanova is part of the CONVERT: a multidisciplinary project run by an international consortium and co-funded by the EU within the ERASMUS Education 2023 Initiative**

COVERT is an ERASMUS+ project that aims to create certified programmes that are on pace with the biggest developments that we witness in the domain of IT. The project will act in the short-term training modules that encompass digital skills. Micro-credentials will allow the programme to be flexible and certified. Some of the main interests of the programme will be skills that are emerging in today's labour market, these include data analytics, data visualisation, programming languages, AI, IoT, web development and design, cybersecurity and data privacy.

**Co-funded by  
the European Union**

## CONVERT

---

Conversion programme to acquire the digital skills needed by forward-looking careers

## Budget

---

€ 899 693

From Jan. 2024 to Dec. 2026

## Consortium

---

10 Partners from Cyprus, Greece  
Italy, France and Germany

## Privanova's role

---

Privanova plays a pivotal role in the COVERT project, addressing the EU's urgent need for skilled workers in the digital era. Our involvement spans various work packages, with a primary focus on identifying high-demand ICT skills required for the ongoing digital transition, collaborating with Work Package 3.

Expanding on this, Privanova actively contributes to crafting a comprehensive training program, creating a micro-credential system to recognize specialized expertise, in partnership with Work Package 4 and Work Package 5.

In the project's final phase, we lead the "Data Protection Compliance and Data Management Plan" task, ensuring the establishment and maintenance of the project's Data Management Plan and serving as the central point for data mapping. Our multifaceted involvement underscores our role in ensuring the project's success.

## Impact

---

COVERT project's impact encompasses the broad dissemination of its findings and training programs during its final phase, with the goal of ensuring widespread access and benefit for individuals, organizations, and industries.
