

**Privanova**  
Research & Consulting

**Privanova is part of the SAFEHORIZON: a multidisciplinary R&D project run by an international consortium and co-funded by the EU.**

In the evolving cyber threat landscape, 'Crime-as-a-Service' (CaaS) has commercialized criminal activities, offering illicit services like malware rentals to anyone willing to pay. SAFEHORIZON counters this by providing LEAs, CERTs, and CSIRTs with a plug-and-play toolbox of open-source solutions. These tools harness web intelligence and machine learning to identify evidence, offering a monitoring platform and resources to help EU LEAs dismantle cybercriminal networks.

**Co-funded by  
the European Union**

## SAFEHORIZON

---

Innovations in Detecting and Disrupting Crime-as-a-Service Operations

## Budget

---

€ 3 998 925

From 1 September 2024 to  
31 August 2027

## Consortium

---

13 Partners from Greece, Romania, Spain, Finland, France, Moldova, Netherlands, Cyprus, Portugal, Luxembourg, Poland

## Privanova's role

---

Privanova plays a crucial role in the SAFEHORIZON project by leading the Dissemination, Communication, and Exploitation efforts.

Privanova is responsible for creating and updating the Dissemination and Communication Plan (DCP), ensuring that all activities align with the project's goals and key performance indicators.

Privanova will also coordinate the establishment of the SafeHorizon Community of Experts, a group of stakeholders who will provide feedback and guidance throughout the project.

Additionally, Privanova will lead the Clustering Management task, focusing on creating synergies between associated projects, establishing a coordinators' network, and organizing Cluster workshops.

Lastly, Privanova will contribute to maximizing innovation, leveraging intellectual property, and developing strategies for the commercial exploitation of project results.

## Impact

---

SafeHorizon will disrupt Crime-as-a-Service (CaaS) by using web intelligence and machine learning to identify evidence for legal action. It will provide LEAs with tools, a monitoring platform, and shared datasets to track and dismantle cybercriminal networks, while also spreading disinformation to undermine their operations.
